

Zscaler™ Professional Services

Advanced Deployment Package

Bolstered by thousands of implementations, our experts will guide you through the swift and successful launch of the Zscaler Cloud Security Platform.

Zscaler Professional Services

Zscaler Professional Services supplements your technical team in conducting a successful launch of Zscaler's security and management solutions across your organization. Designed to minimize the learning curve and to free up IT, security, and audit team resources, Zscaler Professional Services guide you through the process of configuring Zscaler to suit your unique access and security policy needs. By engaging Zscaler Professional Services, businesses of all sizes can maximize the value of Zscaler's innovative security platform in a matter of days.

Advanced Deployment Package

The Advanced Deployment Package was designed to help enterprise organizations quickly begin deploying Zscaler. Built on best practices from thousands of implementations, the Zscaler Advanced Deployment Package helps organizations efficiently and quickly leverage Zscaler across the entire organization.

Benefits of the Advanced Deployment Package

Robust design

The Advanced Deployment Package is designed to help organizations optimize policies for manageability while ensuring security. The Professional Services team leverages best practices to provide organizations with a detailed design plan. This reduces support costs and saves time by avoiding common issues and minimizing cutover inefficiencies. With the Advanced Deployment Package, organizations can efficiently launch Zscaler across all points of user access and all teams involved in managing your policies and security.

Flexible engagement

Every organization has unique needs, which is why Zscaler designed the Advanced Deployment Package with flexible engagement options. We will work with your team remotely to review your current security posture, network

infrastructure, and application requirements. This enables organizations leveraging the Advanced Deployment Package to align on their deployment plan and stay in front of any expiring hardware or software deadlines that would impact deployment timelines.

Comprehensive approach

The Advanced Deployment Package assists organizations by designing and implementing their deployments in detail. From low-level design documents to recommended testing guidelines, the Zscaler Professional Services team is with you every step of the way. A project plan is customized and provided for each deployment. Users are migrated using a low-impact pilot to gain confidence in the solution while accelerating toward a full production migration.

In-depth training

Zscaler Professional Services recognizes that training is a critical component to the success of any deployment. As part of the Advanced Deployment Package, organizations have access to the same courses taken by Zscaler Engineers. This curriculum includes four training credits for online learning modules. Participating in Zscaler training helps build confidence and proficiency in the administration and management of your Zscaler deployment, as well as introducing organizations to new features available in the platform.

Advanced Deployment Package Details

SKU: ZCES-DEP-ADV

Scope	Area	Included	Description
Planning	Architecture + Design Plan	✓	Scope, review the current environment, and provide best practices with the design plan
	Project Management	✓	Provide a task list to phase in the Zscaler service using recommended best practices
	eTraining	4 credits	Self-learning training modules for administrators
Initial Deployment	Traffic Forwarding	Zscaler Client Connector + tunnels	Traffic forwarding to Zscaler via tunnels and the Zscaler Client Connector (formerly Zscaler App/Z App)
	User Authentication + Provisioning	Identity Provider Integration, Hosted DB, LDAP	Single sign-on integration and user provisioning
	Template Policy Recommendations	✓	Security policies configuration guidance using standard templates
	Test Cases & Pilot	25 users	Provide pilot roll-out support to first 25 users with pilot readiness and test guidelines
Advanced Deployment	Advanced Policies	✓	Configuration guidance for purchased advanced modules
	SSL Enablement	✓	Configuration guidance for SSL inspection and enablement using best practices
	Mobile Devices (iOS / Android)	Pilot for the first 5 users per platform	Provide best practices for mobile users for iOS/Android platforms
	Reporting	Built-in analytics	Walk-thru the built-in analytics with operational best practices
	Production Configuration Support	✓	Provide production roll-out support with production readiness plan, Zscaler Mission Critical Audit, and project end summary report
Engagement	Remote	✓	Provide guidance and assistance via email, phone, and web, and conferencing solutions
	Duration	Up to 3 months	3 months of engagement from Professional Services. Start date provided on the PO. Default is the service start date

About Zscaler

Zscaler enables the world's leading organizations to securely transform their networks and applications for a mobile and cloud-first world. Its flagship services, Zscaler Internet Access™ and Zscaler Private Access™, create fast, secure connections between users and applications, regardless of device, location, or network. Zscaler services are 100% cloud delivered and offer the simplicity, enhanced security, and improved user experience that traditional appliances or hybrid solutions are unable to match. Used in more than 185 countries, Zscaler operates a multi-tenant, distributed cloud security platform that protects thousands of customers from cyberattacks and data loss.
