

Zscaler™ Professional Services

Essential Deployment Package

Bolstered by thousands of implementations, our experts will guide you through the swift and successful launch of the Zscaler Cloud Security Platform.

Zscaler Professional Services

Zscaler Professional Services supplements your technical team in conducting a successful launch of Zscaler's security and management solutions across your organization. Designed to minimize the learning curve and to free up IT, security, and audit team resources, Zscaler Professional Services guides you through the process of configuring Zscaler to suit your unique access and security policy needs. By engaging Zscaler Professional Services, businesses of all sizes can maximize the value of Zscaler's innovative security platform in a matter of days.

Essential Deployment Package

The Essential Deployment Package was designed for customers deploying up to 1,000 users with the Zscaler Client Connector (formerly Zscaler App) paired with a single sign-on provider. Security policies are reviewed to ensure they meet our best practices while protecting your organization from the latest advanced threats. Built on best practices from thousands of implementations, the Zscaler Essential Deployment Package helps organizations efficiently and quickly leverage Zscaler across the entire organization.

Benefits of the Essential Deployment Package

Robust design

The Essential Deployment Package is designed to help organizations optimize policies for manageability while ensuring security. The Professional Services team leverages best practices to provide organizations with a detailed design plan. This reduces support costs and saves time by avoiding common issues and minimizing cutover inefficiencies.

With the Essential Deployment Package, organizations can efficiently launch Zscaler across all points of user access and all teams involved in managing your policies and security.

Flexible engagement

Every organization has unique needs, which is why Zscaler designed the Essential Deployment Package with flexible engagement options. We will work with your team remotely to

review your current security posture, network infrastructure, and application requirements. This enables organizations leveraging the Essential Deployment Package to align on their deployment plan and stay in front of any expiring hardware or software deadlines that would impact deployment timelines.

Comprehensive approach

The Essential Deployment Package assists organizations by designing and implementing their deployments in detail. From low-level design documents to recommended testing guidelines, the Zscaler Professional Services team is with you every step of the way. A project plan is customized and provided for each deployment. Users are migrated using a low-impact pilot to gain confidence in the solution while accelerating toward a full production migration.

In-depth training

Zscaler Professional Services recognizes that training is a critical component to the success of any deployment. As part of the Essential Deployment Package, organizations have access to the same courses taken by Zscaler Engineers. This curriculum includes three training credits for online learning modules. Participating in Zscaler training helps build confidence and proficiency in administration and management of your Zscaler deployment, as well as introducing organizations to new features available in the platform.

Essential Deployment Package Service Details

SKU: ZCES-DEP-ESS

Scope	Area	Included	Description
Planning	Architecture + Design Plan	✓	Scope, review the current environment, and provide best practices with the Design Plan
