

Zscaler and Centrify Solution Brief

Centrify for Zscaler is an easy-to-deploy service that offers the industry's most comprehensive solution for Active Directory-based single sign-on, access control, and mobile management. Centrify also supports hundreds of other SaaS apps so your users can get single sign-on to all your cloud-based applications.

PAINLESS ACTIVE DIRECTORY INTEGRATION FOR ZSCALER

Drop-in integration with Active Directory. Centrify for Zscaler provides drop-in integration with Active Directory, requiring no extra holes in the firewall. A 5-minute install securely connects your Active Directory to the Centrify Cloud Service without replicating sensitive data to the cloud or a third-party. Centrify for Zscaler requires no specialized knowledge or dedicated infrastructure in order to deliver secure single sign-on.

Seamless access to Zscaler across all your users' devices. Simply use Active Directory credentials to get one-click access to Zscaler and all your favorite SaaS apps through the MyCentrify Portal. Users can seamlessly access MyCentrify from a web browser or a mobile device — and with Zero Sign On for devices enrolled in the Centrify Cloud Service.

Single sign-on to the rest of your SaaS applications. In addition to Zscaler, Centrify has a catalog of hundreds of pre-integrated cloud apps. Using a personalized MyCentrify portal, users can simply log in once and then point, click, and launch all their SaaS applications without having to remember their username and password for each app. Users can even silently authenticate to the MyCentrify portal without having to log on if they access it from a browser on a computer in their corporate network or through a mobile device that has Centrify for Mobile installed.

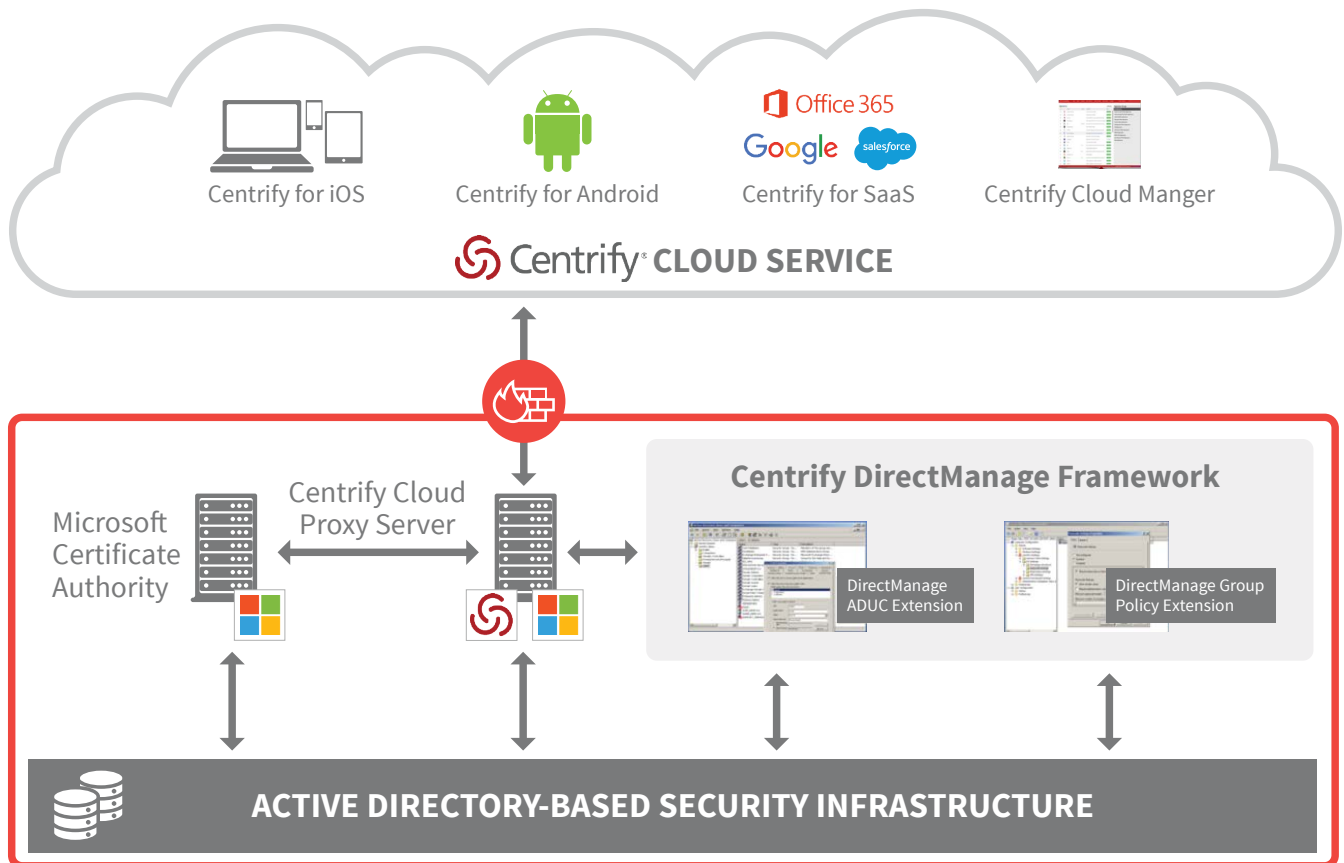

Easiest to deploy solution for federated identity from Active Directory.

- Five-minute install of Centrify Cloud Proxy
- No servers, software, or appliances in the DMZ
- No AD schema changes or software on domain controllers
- No new holes in your firewall
- No replication of Active Directory to a third-party cloud solution

Requirements:

Windows server joined to Active Directory with Internet access for Centrify Cloud Proxy

About Zscaler

Zscaler is revolutionizing Internet security with the industry's first Security as a Service platform. As the most innovative firm in the \$35 billion security market, Zscaler is used by more than 5,000 leading organizations, including 50 of the Fortune 500. Zscaler ensures that more than 15 million users worldwide are protected against cyberattacks and data breaches, while staying fully compliant with corporate and regulatory policies.

Zscaler is a Gartner Magic Quadrant leader for Secure Web Gateways and delivers a safe and productive Internet experience for every user, from any device and from any location—100% in the cloud. With its multi-tenant, distributed cloud security platform, Zscaler effectively moves security into the Internet backbone, operating in more than 150 data centers around the world and enabling organizations to fully leverage the promise of cloud and mobile computing with unparalleled and uncompromising protection and performance. Zscaler delivers unified, carrier-grade Internet security, next-generation firewall, web security, sandboxing/advanced persistent threat (APT) protection, data loss prevention, SSL inspection, traffic shaping, policy management, and threat intelligence—all without the need for on-premises hardware, appliances, or software. About Centrify

Centrify is a leader in securing enterprise identities against cyberthreats that target today's hybrid IT environment of cloud, mobile and on-premises. Centrify helps protect against the leading point of attack used in data breaches – compromised credentials – by securing an enterprise's apps and infrastructure for all its users. The Centrify Identity Platform secures an enterprise's internal and external users as well as its privileged accounts. Trusted by more than 5,000 customers, including half of the Fortune 50, Centrify secures identities across hybrid, cloud, mobile and on-premises IT environments. The Centrify Identity Platform reduces risk by placing identity at the center of protecting data. With unified identity management across cloud, mobile and data center IT environments, corporations benefit not only from heightened security, but from continuous compliance and improved ROI.
